True Beauty radiates from the InsideOut™

FAQ'S

Q: What is MicroCurrent Face and Body Sculpting?

A: The latest non invasive cosmetic procedure **Microcurrent Facial & Body Sculpting technique** is a low cost and painless alternative for those wishing the results of surgical cosmetic treatments. It's also called as the lunch time face lift. Microcurrent technology has been used by the Japanese since World War II as a form of needleless acupuncture. It was made mainstream in the 1980's by an MD named Dr. Robert Becker, who successfully used Microcurrent to treat diabetic skin ulcerations. Eventually, because of its unmatched regenerative properties, Microcurrent found its way in to the cosmetic world. It is the best alternative for those who wish to get back their youthful looks. Microcurrent facial & body sculpting has recently gained popularity in US, especially among Hollywood celebrities. The benefits of the procedure include eliminating fine lines, creases, and wrinkles, restoring the glow of youthful skin, visibly firming, contouring and lifting the overall droop; and tightening sagging jowls, double chins, and fatty cheeks.

Q: How long will the results last?

A: One of the many benefits of microcurrent is the lasting effects on your body. **Your body will age at a slower rate following a microcurrent treatment.** It will heal faster, feel smoother and more toned and function more optimally. Microcurrent increases the blood flow to the area we are treating so it actually improves the health of the targeted area. Some people notice less bloating and better digestion if we are targeting the tummy and better skin tone on any area we target. The beauty of microcurrent is that you can target specific problem areas... AND it builds momentum with additional sessions. The more sessions you have, the better the results.

Q: Does it hurt/Is there any Downtime?

A: **No down time! No pain, redness or swelling!** – It might be hard to believe but this procedure is so relaxing that some clients actually fall asleep during treatments!

Liposuction, Tummy-Tucks and Surgical Face Lifts are serious surgeries that cost thousands of dollars, weeks of down time, and severe discomfort. Not to mention the anxiety you may feel from the possible complications, and scars you're left with. Microcurrent is beneficial to your health, has no down time and is relaxing, painless and affordable!

Q: How much does it Cost?

A: This treatment is not only effective, but it is also Affordable! Each Facial Sculpting Treatment is under \$100! Body Sculpting Treatments range from \$85-\$125! We also have convenient payment plans that may work better for your budget!

Q: How soon will I see Results?

A: While other Microcurrent Facial Treatments proclaim individuals may see some minor change after 3-4 sessions, and significant change only after 15-20 sessions, Beautiful Image Facial Sculpting™ will produce noticeable changes on your first session. Further changes will be even more effective and lasting as your facial “memory” is achieved and sustained at 8-10 sessions.

Q: How many sessions are recommended for the full treatment and how often?

A: Most clients need 12 treatments to achieve maximum benefits. Clients with greater aging effects such as severe neck sagging, deep creases, or distinguished “crow’s feet” at the brow, may need up to 15 sessions. Clients need a 2-3 sessions their first week, then a minimum of one per week thereafter, until the treatment protocol is complete.

Those who are on a short timeline (preparing for a wedding, accepting an award, etc.) may be treated three times per week in order to complete their treatment quicker. After your 10 sessions, your look is maintained by receiving booster treatments every 4 weeks.

Before

After 12 Treatments

*Notice the baby pouch
and extra weight
around her rib cage*

*After 12 treatments notice
the dramatic results; she
has definition down the middle
of her abs. She also lost quite
a few inches around her waist!*

I was skeptical...

"After having two kids, I wanted to explore my options for tightening up the loose skin that I had and lose some weight. After looking at all the body wraps, microcurrent, and other treatment options out there, I decided to join a gym instead and hire a trainer. I didn't want to waste my money if any of these treatments didn't work.

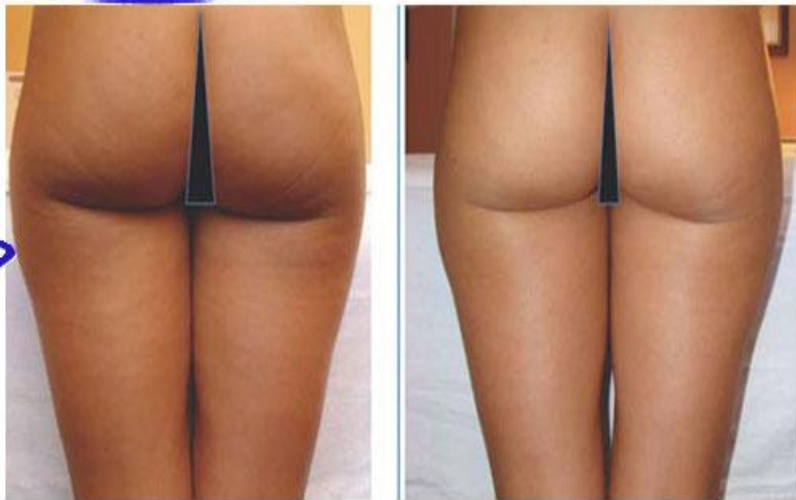

After a year and a half of working out 5 days a week, I was able to lose some weight, but it didn't do anything for my post baby abs. I had talked to InsideOut Wellness about 6 months ago, and had a consultation regarding their microcurrent procedure. The one thing that struck me about this place is that they are very results oriented... I could tell that they wanted me to succeed and achieve my desired results as much as I did. So I decided to give it a try.

I had it in my mind that I MIGHT see results. I didn't want to get my hopes up about tightening the loose skin that I had, because I pretty much had given up wearing a bikini again and bought a one piece. I have to say that **after 12 treatments, I couldn't be happier!** **My stomach didn't look this flat before I had kids.** I have great definition. My husband actually noticed my stomach and commented on how good I looked. I had great results!

If you are a Mom out there and you are debating on a tummy tuck, go with InsideOut Wellness first. It was the best thing that I could have done for myself. I'm more confident and actually started to wear a bikini again!"

Notice the lumpy skin tone and appearance of cellulite prior to treatment.

See how her skin tone improved and the cellulite almost completely vanished. She also shrunk in size and lifted her buttocks significantly as well as toned her thighs!

Before

After 5 Treatments

"I've had cellulite since I can remember and I've always felt so self conscious about it. When I found out about Microcurrent treatments I got excited. I've tried every cream, exercise and diet out there and nothing worked but I had a feeling that this would be different. Well, this time I was right! **My behind has never looked so good or felt so smooth and toned.** I am so impressed with the results that I'll be returning for some facial treatments very soon!"

Before treatment see the puffiness in the cheek area. Also the bags under the eyes and defined lines on her forehead.

After 6 treatments see how her face looks slimmer and more vibrant?

WOW! Look at these dramatic results after 12 treatments! Forehead lines are significantly reduced, skin tightened and even toned & it makes her eyes pop even more!
